

Lift Out Chairs

Ever more rest and comfort with
the new lift out chairs range!

Invacare *Move Up*

NEW

The *Move Up* is the latest addition to the Invacare range of lift out chairs, integrating new features for comfort, mobility and aesthetics.

4 castors for greater comfort

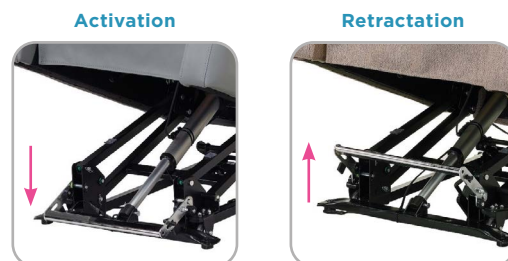

Available as a 1 motor electric version, the *Move Up* has been completely redesigned. Its cosy and inviting style features a soft, padded back and padded backrest. For optimum comfort, side headrests have been integrated into the backrest. The shape of the armrests with rounded corners promotes good upper limb comfort and better blood circulation.

The *Move Up* stands out thanks to its innovative 4-wheel activation mechanism which allows the patient's chair to be moved around the home. Its subtle and elegant look fits easily into most environments.

Unique activation system of the 4 castors

In order to move the chair from one room to another, the *Move Up* is equipped with 4 retractable castors. Activation is effortless by means of a foot pedal on the back of the lift out chair. The user can remain comfortably seated in the chair during the transition. In order to regain its initial stability, the same pedal can be used to retract the castors and ensure safety during use.

A modern and elegant design

Discover our new Heritage coating, designed with more durable and resistant materials. Its waterproof and water-repellent properties make the fabric more durable. Easy to maintain, stains are easily removed with a damp cloth.

This model is available in two colours:

- ▶ Heritage Camel for a cosy and refined look.
- ▶ PVC/Polyester grey for a chic and trendy design.

Features and Options ▼

Removable coating

The **Move Up** has a removable backrest for machine washing. Two zips at the top and bottom of the backrest are easily accessible to remove the backrest coating.

Side pocket

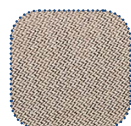

This chair has a storage space for the remote control so that it can be kept close by. This prevents it from being damaged.

Two button remote control

The **Move Up** comes with an ergonomic, easy-to-use 2 backlit buttons remote control.

Complies with fire standard 1021-1 and 1021-2

Invacare **Cosy Up**

The lift out chair **Cosy Up** provides maximum comfort thanks to its real duvet seat and the continuity between the seat and the footrest.

Its modern and uncluttered look is suitable for most people and allows it to easily find its place in any type of environment.

Depth-adjustable backrest as standard

The backrest of the **Cosy Up** can be easily adjusted in depth thanks to its two fixing brackets.

Thus, this chair adapts perfectly to all morphologies, from the smallest (with a depth of 450 mm) to the largest (with a depth of 540 mm).

Two seat widths

The **Cosy Up** lift out chair is delivered with a pair of padded armrests. The pair of thin armrests is available as an accessory for two seat widths. Both are attached to the rigid armrests by means of a velcro and zip system. They are therefore easily interchangeable.

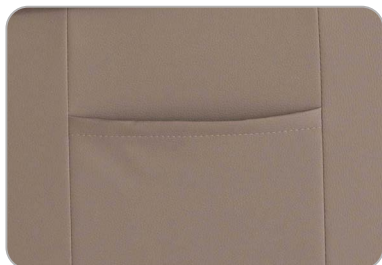

To achieve the small seat width of 450 mm, the padded armrest must be installed.

To achieve the large seat width of 530 mm, thin armrest must be installed.

Features and Options ▼

Large side pockets

Lift out chair with two pockets, one on the left and one on the right, to hold magazines or small objects.

Removable coating for machine washing

The armrests, backrest and seat cover are attached to the base of the recliner by means of a zip and velcro system. All these elements are therefore easily removable, allowing machine washing at 30° or 40° depending on the fabric.

The remote control always at hand

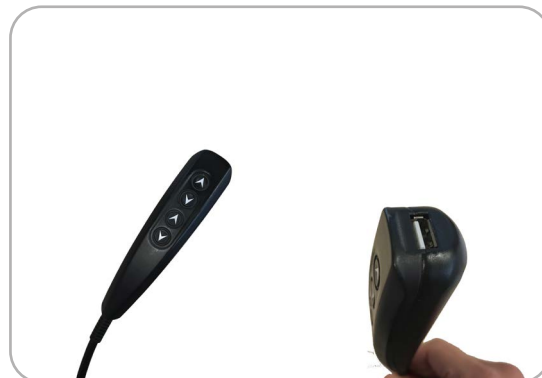

Practice, the design of the armrests allows the user to place the chair's remote control (or TV remote control) under the armrest covers.

Options and Configuration ▼

1 motor version

Ergonomic remote control with 2 backlit buttons, easy to use.

2 motors version

Ergonomic remote control with 4 buttons, with integrated USB port as standard, easy to use.

Back-to-the-wall function

Thanks to the back-to-the-wall function, standard on the 1 motor version of the **Cosy Up**, the backrest of the lift out chair can be placed very close to a wall without this hindering the perfect use of all functions. Thanks to a design optimised for small spaces, only 9 cm are needed between the wall and the chair to allow the backrest to recline fully.

Features and Options ▼

EasyClean fabric : Water cleanable!

Antibacterial and water-repellent fabric, specially treated for cleaning with water. EasyClean fabrics allow you to remove everyday stains such as coffee, chocolate and wine with just a clean cloth and water. The EasyClean fabric prevents stains from penetrating the fabric and thus protects the chair permanently.

Practical and aesthetic, this stain-resistant fabric prevents mildew and is fire-resistant in accordance with the fire standards 1021-1 and 1021-2. Machine washable up to 40°C and suitable for tumble drying, the trendy and comfortable EasyClean cushions make the **Cosy Up** the ideal lift out chair for use in institutions, nursing homes and retirement homes!

Cosy Up: mix, choose and change colours according to your mood!

With its 6 choices of cushion colours and 3 choices of bases, the **Cosy Up** is THE configurable lift out chair. Change the cover as you change your mood and transform your interior in just a few minutes. The **Cosy Up**'s configurability allows the distributor, in a reduced space, to present several colours by changing only the cushion (saving space and inventory!).

You can either order a complete chair or create the chair you want by selecting the base and by choosing the cushions you want: you can now change as many times as you like!

Invacare® **Fino**, Invacare® **Faro**

The good compromise between comfort and simplicity

Functional and uncluttered look, the **Fino** and **Faro** chairs have a modern design that will easily fit into any environment. The standard headrest offers good support and completes the look of this lift out chair. The new Heritage Camel colour is perfect for modern environments.

The Fino chair has small seat dimensions: width 450 mm x depth 450 mm and has padded armrests.

Back-to-the-wall function: requires only 90 mm of clearance for the 1 motor version.

Faro
Camel Heritage

Fino
Camel Heritage

Several versions available

Both models are available in a 1 motor version that allows the footrest to be raised and the backrest to be tilted simultaneously. The **Faro** chair is also available in a 2 motors version (allows independent adjustment of the backrest and footrest) and in a manual recliner version (progressive tilting backwards is done by simply pressing on the armrests).

Faro
Black PVC/ Polyester

Features and Options ▼

Headrest for better support and maximum comfort. It is removable if needed.

Ergonomic and easy to use remote control with 2 backlit buttons (1 motor version).

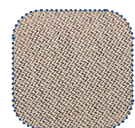

Ergonomic and easy to use remote control with 4 buttons (2 motors version).

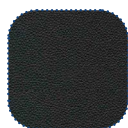

Side pocket for the remote control or small objects (versions with motor).

Invacare® Douro

The meeting of elegance and comfort!

The **Douro** lift out chair offers extra comfort thanks to the continuity between the seat and the footrest. This chair has lateral headrest and a removable fabric headrest. With its uncluttered style and small overall width, it will easily fit into the user's home.

Back-to-the-wall function: requires only 100 mm of setback for the 1 motor version.

Camel Heritage

Several versions available

The **Douro** chair is available in 1 motor version that allows the footrest to be raised and the backrest to be reclined simultaneously.

It is also available in a manual lift out chair version: the progressive tilting backwards is done by simply pressing on the armrests.

Invacare® Porto_{NG}

Sober and classic design

The design of the **Porto_{NG}** lift out chair in Heritage Grey allows it to be integrated in any kind of environment. It offers even more comfort thanks to the continuity between the seat and the footrest and the lateral supports at head level.

Back-to-the-wall function: only 50 mm of backward movement is required for the 1-motor version.

Several versions available

The **Porto_{NG}** is available in a single motor version that allows the footrest to be raised and the backrest to be reclined simultaneously.

The 2 motors version allows independent adjustment of the backrest and footrest.
