

DOLOMITE | *SYMPHONY*

Extra light. Extra adaptable

There is sometimes an obvious need for an extra light walker such as when the user is forced to lift the walker on a daily basis, is weak or has problems breathing.

DOLOMITE SYMPHONY has a rustproof, elegant frame in aluminium, and a total weight of only 6.1-6.8 kilos/13.6-15.1 lbs. The result is an exceptionally adaptable walker that fits just as well in the lounge as it does out in the sea winds.

Aluminium frame

Provides a low product weight and makes it easy to move around with the walker. Its rustproof properties also ensure that the walker remains good looking come rain or shine.

User friendly dabs II-brakes

Long brake handle & long brake stopper - provides good leverage, easy to brake even with weak hand strength. Short distance to park-position - reduces the risk of the user losing parking V-shaped brake stopper. Reinforced cable housing, stainless steel brake stopper.

Features and Options

The low product weight compensates the heavy weight of the oxygen tank.

Use slow-down-brake

When having difficulties to operate the brakes.

A bag hides your belongings and looks good with the silver design.
