Azalea[®] Base

The perfect wheelchair base for
custom made seat units

Yes, you can.

Rea Azalea Base is designed for users seeking a custom-made seat combined with a first-class wheelchair base. The **Rea Azalea Base** is wider in the rear section of the seat, offering the possibility to use larger seating systems on smaller frames. As there are many balance options, it is now lighter to push. A key feature of the Base is the 'Tilt in Space' function - a weight shifting mechanism that ensures reliable stability for the user. All the advantages of our standard **Rea Azalea** models are included and is also cross-compatible with other **Rea Azalea** models (excluding trunk supports). Available in 5 colours.

Seat adaptation

Rea Azalea Base is specifically designed to accommodate custom-made seats. The backrest is angle adjustable including an increased recline which can be angled via a 'rigging screw' or an attendant operated gas piston.

The seat width can be adjusted from the arm and leg rests, and the depth changed via the telescopic seat frame. These features ensure that the **Rea Azalea** easily adapts to different-shaped seat moulds.

◀ Affixing attachments

The seat offers various attachment holes, plus greater 'open space' at the back.

◀ Harness attachment

An attachment for different kind of harnesses is also available as an option.

◀ Seat plate with turnable wedge

An additional +5° seat angle can be obtained, using the optional seat plate with a wedge.

For other Rea Azalea accessories, please consult the Rea Azalea brochure or visit www.invacarearea.com to see videos of them
