

Essential Care

Quality castellated foam mattress

A comfortable pressure-redistributing support surface for people at risk of developing pressure injuries.

A cost-effective solution

For comfort and pressure redistribution

Yes, you can.®

Affordable quality mattress

Pressure Redistribution

- › Castellations help redistribute weight over a greater area.
- › Durable castellated foam for immersion and envelopment to provide optimal pressure redistribution.
- › Excellent recovery properties ensuring good pressure redistribution.

Shear & Friction Reduction

- › Horizontal castellations help reduce shear forces when moving up and down the bed.
- › Multi-stretch, water resistant, polyurethane fabric cover helps further reduce shear and friction forces.
- › Smooth cover supports in the reduction of frictional forces.

Comfort

- › Castellations designed to improve comfort and support.
- › Three-sided zipped cover with white inner liner for easy strikethrough inspection and removal for laundering.
- › Suitable for multiple care environments.

150 mm height	1950 × 880 × 150 mm 2000 × 880 × 150 mm 2050 × 880 × 150 mm	140 kg	95°
120 mm height	1780 × 780 × 120 mm 1950 × 880 × 120 mm	110 kg	95°

Manufactured to: BS EN 597-1 Cig, BS EN 597-2 Match and BS EN 7177: Crib Source 5

Essential nursing care is pivotal in pressure injury management. This mattress may positively contribute to the outcome of a pressure injury prevention plan that includes education, clinical judgment and action planning based on vulnerability, which are fundamental factors in the prevention of pressure injuries. A range of assessment scales can be used as a formal method of assessing risk from pressure injury development, and should be used in conjunction with an informal assessment (informed nursing judgement) as part of a comprehensive and individualised plan.
