

Essential Touch

Double-sided castellated foam mattress

A practical support surface offering comfort, and pressure redistribution.

A cost-effective solution

For pressure injury prevention

Yes, you can.®

Affordable quality mattress

Pressure Redistribution

- › Keyhole cut cells move independently to distribute weight evenly.
- › Castellated foam with independent cells offer greater immersion and envelopment.
- › Larger outer castellations and smaller inner castellations where pressure is more prominent.
- › Suitable for those considered 'At Risk' to 'High Risk' of developing pressure injuries.

Shear & Friction Reduction

- › Castellations help reduce shear when repositioning on the bed.
- › Multi-stretch, water-resistant, polyurethane outer cover further helps to reduce shear and friction.
- › Suitable for multiple care environments.

Comfort

- › Castellations provide greater comfort and immersion.
- › Double-sided castellated foam allows the mattress to be turned or rotated inside the cover for increased product longevity.
- › Cover with two reinforced handles and zipped around three sides for easy handling and removal for laundering.

Sizes available ▼

2000 × 850 × 150 mm
2000 × 880 × 150 mm
2000 × 1180 × 150 mm
2050 × 880 × 150 mm

Max. user weight ▼

150 kg

Max. cleaning temperature ▼

95°

Manufactured to: BS EN 597-1 Cig, BS EN 597-2 Match and BS EN 7177: Crib Source 5

Essential nursing care is pivotal in pressure injury management. This mattress may positively contribute to the outcome of a pressure injury prevention plan that includes education, clinical judgment and action planning based on vulnerability, which are fundamental factors in the prevention of pressure injuries. A range of assessment scales can be used as a formal method of assessing risk from pressure injury development, and should be used in conjunction with an informal assessment (informed nursing judgement) as part of a comprehensive and individualised plan.
