

NordBed™ Ultra

Designed for Clients with Dementia

ERGOMOVE™ TECHNOLOGY | SUPREME SAFETY | FALL PREVENTION

Yes, you can.®

The NordBed Ultra can be configured to meet the special requirements for clients suffering from dementia.

To ensure supreme safety for clients with dementia it is imperative that their care bed supports their independence and mobilisation.

With the low height of only 25 cm in combination with the under-bed light, this reduces the risk for clients to get injured while trying to get in/out of bed during the nights, to increase safety a crash mattress can be used to support the client if any falls occur. The use of side rails could also be used to prevent clients from falling out of bed.

To promote the working conditions of the care staff, the NordBed Ultra is able to reach a top height of 85 cm. The NordBed Ultra can evolve and adapt to the progress of the dementia stages with the client.

Homely aesthetics

Equipped with the soft covers available on bed ends and side panels, gives the NordBed Ultra a homely, tranquil feel for the client. The soft cover provides a textured/smooth surface - a surface the client can feel. The slightly high/low fabric allows a tactile sensory stimulation.

People suffering from dementia can have difficulties to recognise new surroundings. To be able to adapt the NordBed Ultra to be as close to the client's normal environment is essential.

The wide range of bed ends, side panels and side rails in a variety of wood decors allows configuration to meet a recognisable aesthetic look.

Perfect for clients suffering from dementia

- ▶ The low height allows safe environments for people who are mobile
- ▶ The highly configurable bed can be adapted:
 - To look like the more traditional bed
 - To fit in nicely with modern homely looking beds (box mattresses) for easy recognition
 - With a range of soft covers (high/low texture) for a cozy, confident and safe environment
 - Under bed light to reduce the risk of the client being injured while trying to get in/out of bed

4

EXCLUSIVE FEATURES

1

ErgoMove technology

- ▶ Brings the client to a comfortable sitting position and back to horizontal without pushing the client downwards and without the need of repositioning.
- ▶ Reduces shear

3

Up-and-Out™

- ▶ Allows safe and smooth transfers
- ▶ Supports ergonomically correct movement

2

25 cm lowest height

- ▶ With standard castors at 10 cm to allow safe transfers and increase fall prevention

4

Optimised dimensions of mattress support

- ▶ According to anthropometric measurement, for increased comfort

Additional features

- ▶ **RememberMe™:**
 - Programmable LCD handset
 - ErgoMove and Up-and-Out can be adjusted to fit individual needs
- ▶ **Integrated extendable mattress platform**
 - Additional 10 cm at head and foot end to accommodate clients' requirements
- ▶ **Anti-Trendelenburg and *Optional* Trendelenburg**
 - Supports care staff when repositioning the client in bed
 - Easy to redistribute pressure
- ▶ **Under bed light**
 - Easy to turn on the light
 - Fall prevention/safety

Hand control ▲

Easy recognisable colours for clients who are weak-sighted

- ▶ The key buttons, which will be used most frequently have easily identifiable colours. These colours have been chosen in collaboration with experts
- ▶ To assist the client when selecting a feature, all buttons will light up when any button is touched for easy recognition during the day or night
- ▶ For easy selection, the key buttons are positioned at the top of the handset and the adjustment features are placed below the up/down buttons
- ▶ The hand control is lockable as standard
