# Azalea<sup>®</sup> Family

**Azalea family: the full range to  
suit a variety of needs**

**Yes, you can.**

**Invacare Rea Passive chairs** can be modified to suit a variety of clients needs. We ensure each chair is designed to offer as much comfort as possible.

For clients who have specific needs, Rea has developed a range of niche models; each one is part of the Azalea family, but comes with minor modifications, to provide a better fit for the client.

All chairs come with the **Invacare Dual Stability System® (DSS)** and are proven to be safe and durable to last a lifetime.

The Azalea offers individual size adjustments for improved posture, so it is essential that the client has the best fitting model. In addition to the popular width and depth adjustment of the seat area, we also offer the same on the backrest, thus providing a unique combination of possibilities as the modifications are independent of one another.

## Recomendation of backrest options, Matrix, plate or tension adjustable

<p>Plate/Matrx (Tension adj)</p> <p><b>Short</b> All fittings as close as possible</p>	<p>Plate/Matrx (Tension adj)</p> <p><b>Tall</b> Extended backrest height and seat depth</p>	<p>Plate/Matrx Tension adj</p> <p><b>Average</b> Fittings of backrest and seat in standard positions</p>	<p>Plate/Matrx (Tension adj)</p> <p><b>Wide</b> Backrest and seat as wide as possible</p>	<p>(Plate/Matrx) Tension adj</p> <p><b>Wide above</b> Upper part of backrest are wide apart, lower seat is narrow</p>
<p>(Plate/Matrx) Tension adj</p> <p><b>Wide below</b> Lower part of backrest are wider as the seat</p>	<p>(Plate/Matrx) Tension adj</p> <p><b>Larger in front</b> Upper part of backrest turned for allocate space around shoulders</p>	<p>Tension adj</p> <p><b>Larger behind</b> Lower part of backrest turned to allocate space for the protruding bottom</p>	<p>Tension adj</p> <p><b>Khyfotic back</b> Midsection of the backrest is opened up with a tighter support in the lower regions</p>	<p>(Plate/Matrx) Tension adj</p> <p><b>S-shaped back</b> Low midsection is tight whereas the other parts follows the S-shaped spine</p>

### ◀ Backrest options

The Flex 3 tension adjustable backrest has height and width adjustability. Also, it is possible to angle the backrest posts outwards, and you could rotate the backrest upside down depending on where you needed more space such as the shoulders or the bottom.

The Flex 3 backrest plate is adjustable in height and width to match individual positioning needs.

### Offers excellent seating comfort and many adjustment possibilities

The **Rea Azalea** is the natural choice for the moderately active client as well as for the more passive client. The comfortable seating system allows the client to alter the seat positioning, ensuring maximum comfort at all times, thus combined with excellent driving characteristics make Azalea the ideal choice.

### ◀ Rea Azalea

The original self propelling wheelchair with large rear wheels.

### Tilt & recline makes life comfortable

The **Rea Azalea** and **Rea Azalea Assist** have a 25° seat tilt and a 30° backrest recline. Both tilt and recline can be easily modified manually or electronically by the assistant and also by the client using the electrical option.

### ◀ Rea Azalea Assist

The transit version. The **Rea Azalea Assist** shares the frame with the **Rea Azalea** but is mounted with small rear wheels.

### Upholstery ▼

1. Transport weight increases with 4,2 Kg when the Power tilt & Recline option is used

### Tilt in space function ensures stability for the client

Designed for clients seeking a custom-made seat combined with a first-class wheelchair base, the **Rea Azalea Base** is adapted from our standard **Rea Azalea** model and boasts all the advantages of this sturdy, tilting chair, such as the unique weight-shifting mechanism. A key feature of the Base is the 'Tilt in Space' function a weight shifting mechanism that ensures stability for the client when tilted.

◀ **Rea Azalea Base**

Ideal for those in need of a stable, secure chair, with custom-made comfort. The Base is cross-compatible with all other Rea Azalea models (except trunk support).

### Alber viaplus V12

Unlike many other pushing aids, the **viaplus V12** does not impede the adjustability of tilt in space wheelchairs (with a seat height of 450 mm). All of the wheelchair functions remain accessible. That is why the **viaplus V12** can remain on the wheelchair after a walk without restricting the use of its' functions.

### Rea Azalea Minor - Designed for small adults and teenagers

The **Rea Azalea Minor** is designed for clients that require a smaller depth and width seat. Adapted from the **Rea Azalea**, the **Azalea Minor** boasts all the advantages of a reliable, tilting wheelchair with its unique weight-shifting mechanism. Available in 5 frame colours and with a fixed or tension adjustable backrest.

◀ **Rea Azalea Minor**

The push handles of the **Azalea Minor** are angled outwards, increasing comfort for caregivers.

### Rea Azalea Tall - No limits on comfort for taller users

**Rea Azalea Tall** is specially designed to meet the needs of tall clients who require a Tilt in Space wheelchair with more extended seat support. Adapted from the **Rea Azalea**, the **Rea Azalea Tall** boasts all the advantages of a reliable, tilting wheelchair and offers a unique weight shifting mechanism.

◀ **Rea Azalea Tall**

The **Rea Azalea Tall** is at the top of its class for comfort and stability.

## A tailor-made solution for plus size disabled clients

The **Rea Azalea Max** is designed to meet the specific needs of a disabled plus-size client. The **Azalea Max** is a niche product and complements the existing **Azalea family** from Invacare. Available in 5 frame colours.

### ◀ Rea Azalea Max

Designed to meet the needs of tall clients.

## Compatibility

The **Rea Azalea Max** offers the same features as the rest of the **Rea Azalea family** such as tilt-in-space with weight-shifting and DSS® (Dual Stability System) mechanism. Stability in this wheelchair originates from body length compensation in the back and leg rests, beneficial for clients with limited movement and that have difficulty changing position.

### ◀ Two-way backrest

The lower and upper parts of the backrest are interchangeable, giving clients the option of more space in the seat or chest area.
