

A man with a beard and short brown hair, wearing a light blue button-down shirt, is seated in a wheelchair. He is smiling and clinking a wine glass with a woman whose back is to the camera. They are at a restaurant table with a yellow placemat, silverware, and a bottle of water. The background is a blurred restaurant interior with teal walls and framed pictures.

Action^{®4} NG

Stylish and stable with
outstanding functionality

Yes, you can.®

Stability and functionality

The new, improved **Action⁴_{NG}** has been designed with a weight reduction of nearly 1 kg versus the previous model. The **Action⁴_{NG}** makes this weight reduction whilst also building on the previous model's outstanding functionality. Featuring a double cross brace system, the **Action⁴_{NG}** now offers a more stable, easier drive. Furthermore, it is as easy to set up as the other members of the Action Family and shares all the cross compatibility elements that make the family so cost effective.

- ▶ Much lower, overall product weight
- ▶ Improved functionality and new options
- ▶ Updated design with an increased colour range

KEY

EXCLUSIVE
FEATURES

1

Significant weight reduction

Without compromising on the functionality - or limiting the flexibility of adjusting the wheelchair - the weight of the **Action⁴_{NG}** has been reduced by nearly 1 kg. This is, in part, thanks to a new lightweight castor housing design and an optimised rearwheel attachment which are both made out of aluminum. These design changes mean that the **Action⁴_{NG}** is setting the standard once again, becoming even easier to propel and lift in and out of the car for transportation.

2

Attention to detail

Invacare's team have redesigned the **Action⁴_{NG}** in multiple areas. A new fork design provides a lighter look, the backrest upholstery has improved style and the new, fresh frame colors are taking the **Action⁴_{NG}** to the next level in terms of style. You can see our attention to detail in every component of the wheelchair, reflecting our aim to deliver style without compromise.

3

Easy to set-up and change

Despite this wave of new improvements, the **Action⁴_{NG}** manages to stay fully cross compatible with the other members of the Action Family, meaning all new components of the wheelchair fit to previous models.

4

Improved functionality

New, cleverly designed features make the **Action⁴_{NG}** even easier to use than its predecessor. An added lever to the swing away armrest makes it easier to release and transfer out of the wheelchair, whilst at the same time the sideguard design has been optimised with a cut-out and foam grip to allow a smoother transfer (on the height adjustable version).

A patented, intuitive, stepless angle adjustable backrest system with folding function has also been added as an option which makes it possible to optimise the backrest position to the absolute perfect fit. Furthermore, the oversized backrest cover now covers the back canes, increasing comfort, whilst the lumbar strap has been made height adjustable, allowing perfect positioning regardless of the height of the cushion. We have added all this functionality because we know that details that matter, every day.

► Lightweight

The **Action⁴_{NG}** has a basic weight from 14.7 kg and a transportation weight of 8 kg (without legrests, armrests or rear wheels). With the lightweight wheels this can be reduced to 14.0 kg.

► Rearwheel support

The new aluminum rearwheel support, combines lightness with functionality.

► Castor housing and fork

Aluminum castor housing, combined new fork design, combines weight reduction with style.

▲ Flip-back Armrest No.2 and No.3

Both armrest options now feature a release lever and an open zone - with handgrip - for easy transfer out of the chair. In addition the No.3 armrest is also fully height adjustable.

Stepless, adjustable, folding backrest

This innovative, patented, angle adjustable backrest – incorporated from the *Invacare Action⁵* - allows fine adjusting of the backrest angle when the user is seated in the wheelchair. This unique folding mechanism enables users to fold the backrest on top of the seat for easy storage or transportation in a car. In addition, the built in scale allows for a more accurate backrest angle to be set for the user.

◀ **Amputee support**

Offering height, angle and depth adjustments with a durable, moisture proof design, this swing-away support is ideal for transfers.

◀ **Tie-down hook**

A bright, orange tie-down hook provides a secure fixation point for transportation in a motor vehicle.

◀ **Dual handrim propelling wheels**

The Dual Handrim version is ideal for hemiplegic users. The telescopic, spring-loaded connections can be removed so the chair remains foldable.

▲ **Front castor**

Front castors available in 5", 6" and 8" pneumatic or solid tyre, with various options of tyre width also available.

▲ **Belt buckle**

Different belt buckles are available, including the padded BodyPoint 2 and 4 point belts.

Options ▼

▲ **Matrix® seating**

From basic cushions, to the top of the range *Invacare Matrix Libra* cushions, Invacare offers a large variety of seat cushions to accommodate a range of user needs. The *Invacare Matrix Elite* and *Elite Deep* backrests come complete with the EasyMount quick release system, which allows quick, simple removal when the chair is folded. This compatibility with our extensive seating and backrest range put's comfort and support at the heart of the *Action4_{NG}*.

▲ **Length compensating elevating legrest**

This legrest combines optimal length compensation with 0-80° elevation.

▲ **Reclining backrest**

The reclining backrest, both mechanical and gas spring, allow carers to make quick, easy adjustments to the users position.

▲ **Head and neck rest options**

A choice of head and neck rest options are available - including the award winning Elan headrest - to help give users the maximum level of comfort and support.
