

Dyna-Form[®] Maximus

Bariatric foam mattress

Comfort and pressure redistribution

for high-risk patients up to 413 kg

High-risk bariatric pressure care

Bariatric pressure care

- > Finest quality Combustion Modified Ether (CME) foam construction supports the weight of heavier patients and prevents bottoming out, while delivering effective pressure redistribution.
- > Specifically designed for bariatric patients considered at High Risk of pressure ulcer development.
- > Weight limit of 413 kg

Cover and hygiene

- > Multi-stretch, vapour permeable cover reduces shear and friction forces and helps control infection.
- > Cover fabric is impregnated with an anti-fungal agent and can be laundered up to 80 °C.
- > Hypochlorite compatible at 1,000 ppm (0.1%), to be used in line with local infection control guidelines.

Durable and adaptable

- > Toughened, non-slip polyurethane base gives a robust surface against hydrolysis and strikethrough, and prevents slippage.
- > Supplied at 880 mm wide as standard, and can be made to the dimensions of any bariatric bed frame.
- > Supplied with a 4-year warranty.

Technical data ▼

Height ▼

150 mm

Width ▼

880 mm*

Length ▼

1980 mm*

Max. User Weight ▼

413 kg

Total weight ▼

17 kg

Max. Cleaning Temperature ▼

80 °C

* Specific sizes available on request.

Manufactured to: BS EN 597-1 Cig, BS EN 597-2 Match and BS 7177 (ignition Source 5)

Essential nursing care is pivotal in pressure injury management. This mattress may positively contribute to the outcome of a pressure injury prevention plan that includes education, clinical judgment and action planning based on vulnerability, which are fundamental factors in the prevention of pressure injuries. A range of assessment scales can be used as a formal method of assessing risk from pressure injury development, and should be used in conjunction with an informal assessment (informed nursing judgement) as part of a comprehensive and individualised plan.
