

liam dwyer trial success

Category: Matrix Libra

Since the launch of the Matrix Libra a number of wheelchair services have been actively trialling the cushion in their service.

Liam Dwyer has been using a wheelchair since 2007, having a slow form of Motor Neurone Disease and spending anything from 10 to 17 hours a day in his wheelchair. Liam is a keen researcher of the latest medical devices in the market, researching suitable equipment to meet his needs. Having trialed the Libra cushion extensively he's kindly shared with us the following feedback.

"When I was given the Invacare Matrix Libra to trial I knew after a full day's use that this was the cushion for me. Don't take my word for it, but make sure you've got the correct size cushion for your wheelchair when you trial it, as you will not want to give it back."

If you have an interesting case or would like to trial a Matrix Libra cushion please contact uk@invacare.com
