

HEEL PRO EVOLUTION

Maxxcare®

USER MANUAL

Dear customer,
Please read and understand this user manual before use. Save this manual for future reference.
For more information or to (re) order manuals, contact your country's distributor.

Introduction
The Maxxcare Heel Pro Evolution is used to offload pressure on the heel and ankle. The Heel Pro Evolution contains four removable air-tubes that offer protection against pressure. The extremely smooth exterior offers protection against shear forces and friction. The Heel Pro Evolution can be used while lying down and sitting. Walking a short distance indoors, for instance from bed to bathroom, is possible as the non-skid material on the bottom reduces the risk of sliding. Take care not to load the heel while walking, as the exterior fabric around the heel is very slippery.

Indications

Use the Heel Pro Evolution

• To prevent heel- and/or ankle injuries for patients with an increased risk of developing injuries due to pressure or shear.

• As an additional therapeutic measure for patients with existing decubitus of the heel.

- To reduce heel pain during prolonged periods of bed rest.
- To help prevent footdrop.

A Maxxcare product is intended for therapists or Assistive Technology Professionals to assess and use with individuals at risk of pressure injuries. Experienced therapists or ATPs should determine its suitability for each individual.

Contraindications

When used as intended, there are no known contraindications.

Precautions and safety instructions

⚠ Warning!

The Maxxcare Heel Pro Evolution may only be used as a heel protector. The use of this product in any other way, is considered to be misuse. Maxxcare B.V. cannot be held responsible for damage caused by misuse, improper use or negligence. Make sure that you read and understand this manual completely.

Maxxcare B.V. recommends to use the Heel Pro Evolution under direct supervision of a therapist or Assistive Technology Professional.

• Check your skin regularly for redness, especially during the first few days. If redness occurs and does not disappear after 15 minutes, consult your therapist or Assistive Technology Professional.

• Check the Heel Pro Evolution before use for deflated air-tubes, and regularly for broken seems and other damages. In case of serious damage or deflated tubes, do not continue to use the product. Consult your Assistive Technology Professional.

• Please note: When inserting, make sure that the top of the large air-tubes is laid flat against the back of the Heel Pro Evolution. See A (Pic. VII).

Reporting of serious incidents

Serious incidents from use of Maxxcare products should be reported to the manufacturer and the relevant competent authority.

Warranty

Maxxcare offers a limited warranty against defects in workmanship and material for a period of six (6) months after the original date of purchase, provided the product has been used normally. Any damage arising from abnormal use, or caused by improper handling, cleaning or negligence, is excluded from this warranty.

HANDELING

Beste klant,

Zorg ervoor dat u deze

gebruikershandleiding voor

gebruik leest en begrijpt. Slá de

handleiding op voor toekomstig

raadplegen.

Voor meer informatie of het

bestellen van handleidingen, neem

contact op met de distributeur in

uw land.

informatie.

Caution!

• Do not dry clean or

autoclave the product. The

product cannot withstand

excessive heat or pressure. When

the given cleaning instructions

are not followed, it is very likely

that the product will age more

rapidly.

• Do not use aggressive or abrasive

cleaners, or sharp objects to

clean the product.

• Excessive washing may influence

the aging of this product.

Use

⚠ Warning!

Do not fasten too

tightly. This may cause a

reduction of blood flow and/or

discomfort.

1. Check if the size of the Heel Pro

Evolution is correct. (Pic. I)

2. Write patient's name on label. (Pic. III)

3. Open hook and loop straps and place patient's foot into the Heel Pro Evolution. (Pic. IV)

4. Loosely fasten hook and loop straps. (Pic. V)

Conditions for use and storage

• User weight:

Minimum: 0 kg / 0 lbs, maximum:

150 kg / 330 lbs

• Temperature:

Minimum: -10 °C / 14 °F, maximum:

50 °C / 122 °F

• Air humidity:

Minimum: 0%, maximum 100%

Re-use

The product is suitable for repeated use by a single patient. The number of times it can be used depends on how often and in which way the product is used. The product has to be thoroughly cleaned and disinfected, before you are allowed to re-use it. See chapter 'MAINTENANCE AND CLEANING' for instructions.

Expected lifetime

The expected lifetime of this product is one year when used in accordance with the safety instructions, maintenance intervals and correct use, stated in this manual. The effective lifetime can vary according to frequency and intensity of use.

Disposal

The disposal and recycling of used devices and packaging must comply with the applicable legal regulation. Ensure the product is cleaned prior to disposal to avoid any risk of contamination.

Maintenance and cleaning

Cleaning the Heel Pro Evolution

The Heel Pro Evolution can be machine washed at 60 °C / 140 °F using an anti-collapse cycle and mild detergent. You do not need to remove the air-tubes before putting the product into the washing machine. Spin speed should be reduced. When using a machine with agitator, make sure that the product can move freely within the drum. Do not use any chlorine bleach! Do not tumble dry, but let it air dry (5-6 hours). Only use when the product is completely dry.

Precautions and safety instructions

⚠ Warning!

The Maxxcare Heel Pro Evolution may only be used as a heel protector. The use of this product in any other way, is considered to be misuse. Maxxcare B.V. cannot be held responsible for damage caused by misuse, improper use or negligence. Make sure that you read and understand this manual completely.
