Indoor practicality

With a small wheelbase, the Indoor MkIV is more manoeuvrable in and around the home. It offers great value for money with proven **Apollo** quality and is unrivalled in the market place. The **Apollo** has a fully padded seat and back as standard, and is available in 5 different seat widths and 3 seat depths to suit all client requirements.

Indoor version

The *Invacare* **Apollo Mk IV** is the ideal indoor chair. Its narrow styling and small turning circle make it the practical choice in confined spaces, and the sensitive programmable controller gives the user the ability to manoeuvre confidently, in full control at all times.

The 30Ah batteries provide enough power to get around all day, and the handy plug-in charger in the controller allows recharging of the batteries when needed. Simply plug-in to any household mains supply to recharge.

Features and Options

Footrests

The adjustable footrests swing away, allowing easier access to the front of the chair for both versions.

Folding backrest

Reduces the overall size of the chair when folded for transportation or storage.
